What information is available on the validity and reliability of the SDLRS/LPA? Based on a population of 3,151 individuals from the United States and Canada, a split-half Pearson product moment correlation with a Spearman-Brown correction produced a reliability coefficient of .94 (Guglielmino & Guglielmino, 1991).

SDLRS/LPA
Johns Hopkins Researchers Validate Using Senior Risk Factors to Predict Utilization. The Center for Population Health Information Technology and the ACG SystemTeam recently published a breakthrough article in Medical Care presenting and evaluating the ACG System’s new expanded Geriatric Risk/Frailty Risk metrics for predictive modeling derived from both ‘structured’ and ‘free text’ EHRs.

Johns Hopkins ACG® System
Disease management is defined as "a system of coordinated healthcare interventions and communications for populations with conditions in which patient self-care efforts are significant.". For people who can access health care practitioners or peer support it is the process whereby persons with long-term conditions (and often family/friend/carer) share knowledge, responsibility and care plans ...

Dream Chaser Space System is a planned human-rated version designed to carry from two to seven people and cargo to orbital destinations such as the International Space Station. It is to have a built-in launch escape system and could fly autonomously if needed. Although it could use any suitable launch vehicle, it is currently planned to be launched on a human-rated Atlas V 412 rocket.
